Professional Summary

Software Developer and BS Computer Science student (CGPA 3.87) with hands-on experience building Python backend services, REST APIs, full-stack SaaS applications, and conversational AI systems. Promoted from intern to developer at Finova Solutions, with experience delivering product features, integrating third-party services, and mentoring interns. Strong foundation in object-oriented programming, data structures, and algorithms.

Technical Skills

Languages: Python, JavaScript, TypeScript, C++, SQL
Frameworks & Web: FastAPI, NestJS, React, REST APIs, WebSockets
Databases & Infrastructure: PostgreSQL, Supabase, Firebase, Docker
Developer Tools: Git, GitHub, Claude Code, OpenAI Codex
AI & Integrations: LLM API integration, conversational AI, speech-to-text (STT), text-to-speech (TTS), Deepgram, ElevenLabs, IBM watsonx
Real-Time & Telephony: Twilio, Telnyx, LiveKit, call orchestration

Professional Experience

Software Developer (Promoted from AI Intern) | Finova Solutions *Apr 2026 – Present*

- Developed backend APIs and frontend workflows for SaaS products involving AI voice agents and automated call evaluation.
- Implemented call-processing, input validation, reporting, and configuration features connecting application interfaces with backend services.
- Contributed to a self-service AI-agent platform supporting provider selection, organization-level API-key configuration, and test-call workflows.
- Led and mentored interns through onboarding, task delegation, code reviews, and feature delivery.

AI Intern | Finova Solutions *Feb 2026 – Mar 2026*

- Built a real-time voice AI pipeline connecting telephony, speech-to-text, large language model (LLM) responses, and text-to-speech for automated calls.
- Collaborated with senior engineers on telephony API integration and reducing latency in conversational workflows.

AI Intern | SPS-NASTP *Jun 2025 – Jul 2025*

- Configured chatbot dialogue flows and IBM watsonx Assistant workflows for the GreenKeyper application.

Education

Bahria University | BS Computer Science *Expected Dec 2027*
CGPA: **3.87**

Selected Engineering Projects

QualiCall – AI-Powered Call Evaluation Platform *Python, FastAPI, JavaScript, SQL*

- Developed REST APIs and full-stack modules for call uploads, input validation, processing-status tracking, and report-generation workflows.
- Connected backend processing with frontend views displaying evaluation reports and actionable call insights.

Telephony SDK – Internal Developer Toolkit *Python, Twilio, Telnyx, LiveKit*

- Developing a unified Python SDK to standardize telephony-provider integrations across voice-agent services.
- Designing reusable interfaces for provider switching, call orchestration, and real-time event handling.

Awaaz Voice Agent – Conversational AI Call Automation *Twilio, LLM APIs, Voice AI*

- Built conversational calling workflows integrating telephony, STT, LLM response generation, and TTS for natural interactions.
- Integrated Twilio and improved response timing to approximately 600 ms, with a worst observed latency of 800 ms in testing.

AwaazLabs Self-Serve – No-Code AI Agent Builder *JavaScript, REST APIs*

- Building a self-service platform where non-technical users can configure, test, and deploy AI voice agents.
- Developing dashboard and backend workflows for provider selection, API-key management, test calls, and configurable AI, STT, and TTS services.

AIDRA – Adaptive Intelligence Disaster Response Agent *React, TypeScript*

- Built an AI-assisted disaster-response simulation for urban triage, routing, and resource allocation under uncertainty.
- Developed a real-time, tick-driven simulation engine and React/TypeScript interface for scenario visualization and decision support.

EarthScan AI – Satellite Damage Classification *Python, Deep Learning*

- Built an AI application to classify building damage from pre- and post-disaster satellite imagery using the xBD/xView2 dataset.
- Integrated image preprocessing, trained-model inference, confidence scores, charts, and a change heatmap to explain results.

Awards & Certificates

CodeQuest: 2nd Position (GDGOC x YOTA)
Merit Scholarships: 1st (Semester 5), 2nd (Semester 3), 3rd (Semester 2)
Prime Minister's Laptop Scheme 2025: Selected Recipient, Phase IV
IBM watsonx Orchestrate & Assistant: Technical Sales Intermediate
